

[PRESS RELEASE CSD 2022](#)

Who we are

Tecnoform is an Italian company that since **1965** has been producing furnishing components and solutions for the **RVs, Marine Leisure** and **Luxury Furniture** sectors.

Our main products are **furniture parts** as **doors, tables** and **tops, complete furnishings**, and **modular kits** flat pack. Each product is designed in collaboration between the Tecnoform technical team and the RV manufacturers' design dept.

Our products are distributed in **Europe, United States** and **Australia**.

We are an industrial company, but we keep an artisanal approach. Today we are recognized as world leaders: ***The RV Furniture Brand***.

[CSD 2022 - Fresh shapes. Dive into our world.](#)

The theme of the sea. The Tecnoform freshness.

Our aim is to bring at the 2022 Düsseldorf edition a wave of freshness and innovation.

The marine theme acts as a common thread between concepts and products:

- The innovative product **Nowocore®** - light, sustainable, durable and water-resistant
- **Waves** - curved, dynamic and wavy locker door shapes, a source of inspiration for original geometries.
- A spacious showroom where to discover the Tecnoform world.

[Showroom: The products](#)

Our core products such as locker **doors, tops** and **modular kits for vans** are displayed in the showroom. Elegance of shapes and decors, high quality and technical performance are the main Tecnoform distinctive features.

Here below the highlights:

- **Flexible solutions** - our space-saving tables and tops. Comfortable, easy to use, light, suitable for any type of vehicle. The RV layout is therefore boosted with additional living space.

- **The Inspirational Design area** – our wide range of selected decors in line with the latest design trends. Our know-how at Your disposal to combine patterns and textures and create stylish interior living.
- **Waves** – our new doors shapes are dynamic as waves, featuring unusual and contemporary curve radius, to inspire sensational looks.

Innovation room. The future is Nowocore®

Being the result of an intense research of the last two years, Nowocore® meets the challenging features requested by the RV market:

- **Lightweight:** a key factor within the present and future RV sector.
- **Sustainability:** Tecnoform continuous engagement to reduce impact on the environment is a core value. The Manifesto of 1000 Green Companies (promoted by the Emilia-Romagna region, Italy), has been just signed by Tecnoform, to achieve a challenging list of goals over the coming years.
- **Resistance and durability** above average.

The long research and development process carried out by Tecnoform Innovation Department has proved that:

- **Nowocore® is light!** Compared to similar products, the achievable weight saving is between 20% and 37%, depending on the furniture component shape.
- **Nowocore® has a sustainable core!** The inner part of the furniture piece is composed of **recycled PET foam** from post-consumer waste. The face sheets are made of polypropylene lightened with sawdust, coming from the manufacturer's internal recycling.
- **Nowocore® is durable and resistant**, tested to withstand extreme humidity and temperature conditions. Once coated with a suitable material, it becomes totally water-resistant. The plastic skins make the surface very hard and with good impact resistance – one order of magnitude higher than poplar panels!

We invite you to discover the latest news and proposals of this CSD 2022 edition.
